

## Products and Services

### Proficiency Testing

ASTM Proficiency Testing Programs (PTP) are statistical quality assurance programs that enable laboratories to assess their performance in conducting test methods within their own labs when their data are compared against other labs that participate worldwide in the same program.

### Interlaboratory Studies

The Interlaboratory Study Program (ILS) assists ASTM technical committees in fulfilling the requirement that every test method be accompanied by a precision and bias statement that is supported by interlaboratory test data and fully documented in a research report.

### Training Courses

ASTM Training and E-Learning Courses are high-quality award-winning continuing education programs for industry and government. Online training offers self-guided computer-based training, while onsite training takes place at your facility. For professional engineer license renewal, ASTM is an approved provider of professional development hour activities in some states.

### Certification Programs

For independent third-party demonstrations of compliance to standards, ASTM Certification Programs cover products (including materials, systems and services) and personnel.

- Environmental Product Declarations
- Product Category Rules
- ASTM Personnel Certificate Program

## ASTM COMPASS

ASTM Compass™ is a portal that gives your entire staff 24/7 online access to all the ASTM and third-party content your organization needs. This includes standards, training, technical books, journal articles and papers.

A subscription to Compass™ provides:

- Access to the standard you choose;
- Online tools for adding notes, images and attachments and sharing with your staff;
- ASTM training modules;
- Translated standards;
- Color-coded highlights identifying changes to standards;
- and more.

## ASTM International

Over 12,000 ASTM standards operate globally. Defined and set by us, they improve the lives of millions every day.

Combined with our innovative business services, ASTM standards enhance performance and help everyone have confidence in the things they buy and use – from the toy in a child's hand to the aircraft overhead.

Working across borders, disciplines and industries we harness the expertise of over 30,000 members to create consensus and improve performance in manufacturing and materials, products and processes, systems and services.

Understanding commercial needs and consumer priorities, we touch every part of everyday life: helping our world work better.

### Types of ASTM Standards

ASTM's **specifications** and **test methods** are the technical foundations of quality and precision — from the earliest stages of product development through inspection and product labeling.

ASTM's technical **practices, guides and terminology standards** further pave the way in conveying precise meaning as well as for agreed-upon ways of conducting business.

The end result: materials that are reliable, manufacturing practices that are streamlined, and global commerce that is facilitated through ASTM International standards.

### Membership

A global network of technical experts drafts ASTM standards, votes on their content, and keeps them current. Engineers, scientists, academicians, government representatives, consumers and others from 150 countries make up ASTM's membership.

You can be part of this global network.

Membership is open to all who have an interest. The annual membership fee is \$75 USD, and benefits include publication discounts, the ASTM magazine and email newsletter, and much more. Members can choose whether or not to participate on any of ASTM's 145 technical committees.
